Instructions

You **may** use a calculator to answer any questions in this test.

Work as quickly and as carefully as you can.

You have **45 minutes** for this test.

If you cannot do one of the questions, **go on to the next one**. You can come back to it later, if you have time.

If you finish before the end, **go back and check your work**.

Follow the instructions for each question carefully.

This shows where you need to put the answer.

If you need to do working out, you can use any space on a page.

Some questions look like this:

Show your **method**. You may get a mark.

For these questions you may get a mark for showing your method.
Draw a line to join two other numbers which have a total of 700.
2 Circle the number which is nearest in value to 750

570  699  810  852  1050

Here are three clock faces.  
Match each clock face to the same time on a digital clock.

3a

3b
4 Write in the missing number.

\[ 60 + 99 + \square = 340 \]

5 A shop sells postcards in packs of 6 and packs of 8.

Alan bought 4 packs of 8 cards.

How many cards did he get?

Shereen bought some packs of 6 cards.

Altogether she has 30 cards.

How many packs of 6 did she buy?
6. Draw the reflection of the shape in the mirror line.

Use a ruler.

You may use a mirror or tracing paper.

7. Write two numbers, each greater than 100, to complete this subtraction.

\[ \phantom{123} - \phantom{123} = 208 \]
These are the opening times at a swimming pool.
